

Installing HIS Video Card on Falcon 40cq Step-by-Step

Section 1

How to Install your new Video card into the system

- a. Turn off system.
- b. Unplug power cord .
- c. Open system cover.
- d. Unscrew and remove the Panel Cover at the back of the system.

- e. Once you are PROPERLY GROUNDED* remove the card from the Anti Static bag .

*This is achieved with the use of an Anti Static wrist strap or other Anti Static device

- f. Plug the video card into PCI-E (Slot J3 recommended).

- g. Replace the screw for the PCI Panel holder from STEP D at the back of the system.
- h. Close system cover.
- i. Plug in power cord.
- j. Start up the system.
- k. Once logged into windows install software driver that was provided on the install CD.

Note: We strongly recommend adding one more system fans. Especially if your system has a Hardware Raid Controller or if one was provided as part of your addon video card kit.
